

The Shop Pro® is a multipurpose shop floor tool, custom designed to remove water and contaminants from diesel fuel tanks, transfer diesel fuel, and prime diesel engines, including the engine line.

Applications

Priming

- Eliminates the use of hand priming pumps after performing maintenance
- Uses onboard fuel to prime engines and filters, avoids the hassle of keeping reserve fuel on hand

Fuel Transfer

- Filters and transfers fuel in one operation
- Transfers fuel when repairing tanks
- Transfers fuel for equipment being sold or taken out of service

Tank Cleaning

- Removes contaminated fuel, sediment, and water from fuel tanks of diesel powered or from diesel storage tanks
- Cleans fuel tanks during service — can be a value added service or a new revenue stream
- Eliminates downtime due to fuel contamination

Features

Cart

- Custom design with heavy duty construction
- Portable and self-contained

Electrical and Motor

- UL® Listed, Closed electrical box and 120VAC connection uses standard extension cord
- 120 VAC Electric motor rated for continuous operation

Pump

- Heavy duty gear pump, up to 95 PSI

Filtration

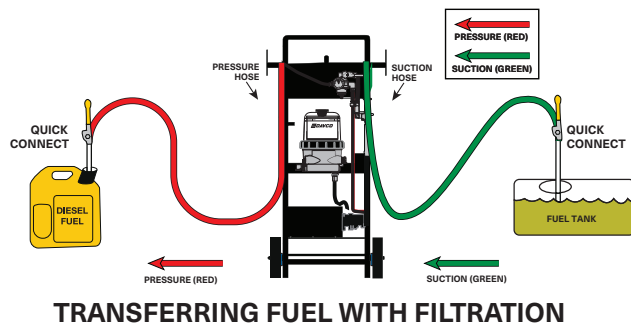

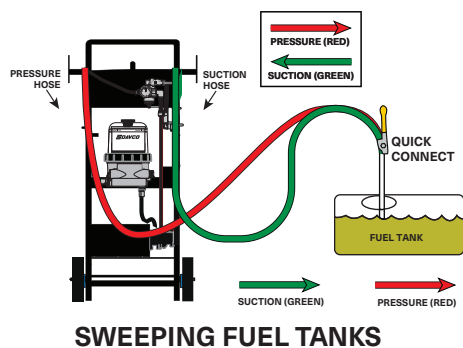

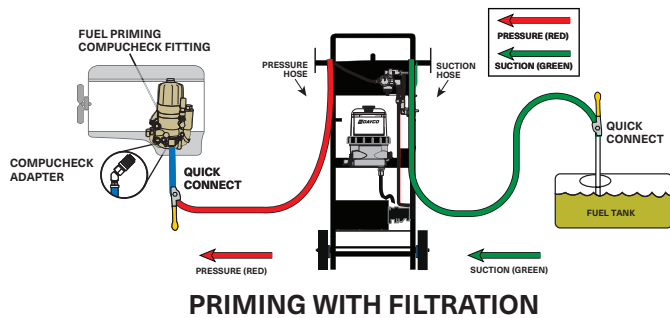

- All Shop Pro® units filter fuel to 10 microns with three layer filtration

Adapters and hoses

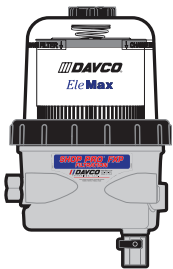

- No-drip fittings
- Color-coded for function

SHOP PRO® FXP

Operating the Shop Pro®

Shop Pro® Filtration

- Clear cover allows easy visual check of fuel condition
- Patented filter element design for extended life and maximum filtration performance
- Filter fuel to 10 microns
