

DAVCO Technology Tech Training Course

The DAVCO Technology Tech Training Course consists of six modules. Each module consists of reading through an online presentation and completing a quiz. Modules can be completed at the enrollees' convenience. Upon completion of the course, a certificate is emailed to the enrollee.

Module Title	Module Description
DAVCO Technology Introduction Course	Introduction to basic DAVCO product information
Diagnosing Air Bubbles and Leak Testing	Review steps for diagnosing air bubbles and determining where leaks are occurring from and understanding vapor bubbles
Diagnosing and Testing Overnight and Pre-Heater	Steps in trouble shooting the 120VAC overnight heater and the 12/24VDC PTC pre-heaters
Fuel Pro® Fluid Heat Diagnosis and Testing	Steps on how to diagnosis and test the fluid heat option on Fuel Pro® products
Fuel Pro® and Diesel Pro Check Valve Diagnosis and Testing	Steps in trouble shooting the Diesel Pro® and Fuel Pro® check valves
Water-in-Fuel Sensor Diagnosis and Testing	Steps on how to diagnose and test DAVCO Water-in-Fuel (WIF) sensors

About DTI

The DAVCO Training Institute was developed to educate and train the highest caliber technicians and parts associates. The training course focuses on product knowledge, application, and diagnostics.

The DAVCO Training Institute is completely free and available to all DAVCO customers and fleets. To start, email customerservice@davco.com with your name, company, and email address or submit the request on the DAVCO website at <https://www.davco.com/certifications/>.
